

June 2025

# NES3 Token White Paper

# Executive Summary

Next-gen asset merging  
blockchain & AI-driven  
gaming

Decentralized economy  
for payments, staking,  
governance, premium  
access

Transparent, low-fee,  
security-first design

# Introduction

- AI & automation transforming industries
- Gaming & robotics platforms remain siloed
- NES3 delivers instant, low-cost on-chain transactions
- Autonomous AI agents operate permissionless
- Community steers evolution via token voting

NESR3

digital colored with a seed ♥

and fish and forests

# Vision & Mission

- **Vision**

- Borderless ecosystem for AI-powered devices
- Secure, efficient, transparent on-chain operations

- **Mission**

- Smart-community economy built on NES3
- Real-world utility: game charging, robotic services

# Technology Stack

Layer-1 blockchain: DPoS, 2-s block time, sub-cent fees

Smart-contract suite: modular & upgradable

AI & Robotics gateways for device orchestration

Public ledger dashboards & IPFS audit logs

Formal-verification, multisig treasury, HW-secured validators

# Token Utility

PAYMENT – SETTLE FEES  
FOR ROBOTIC TASKS &  
IN-GAME ITEMS

STAKING – LOCK TOKENS  
& EARN REWARDS

GOVERNANCE –  
PROPOSE & VOTE ON  
UPGRADES, TREASURY

ACCESS – UNLOCK  
PREMIUM CONTENT &  
ADVANCED FEATURES

# Tokenomics

Total Supply: 1,000,000,000 NES3 (fixed)

Team – 15% (12-mo cliff, 24-mo vest)

Investors – 25% (6-mo cliff, 18-mo vest)

Community – 35% (grants, play-to-earn, liquidity mining)

Development – 25% (milestone-based treasury releases)
